

Customizing Your Affiliate Control Panel

Customizing the front-end of your affiliate control panel has been made as easy as possible.

- ✔ Customize the page width, main logo, background image and all the colors.
[Admin Center: Templates > Control Panel Customization](#)
- ✔ Add/Edit text, paragraphs and general content.
[Admin Center: Templates > Language Templates](#)
- ✔ Edit the HTML templates.
This can be done via FTP. All your HTML templates are located in the /templates/ folder and they are all developed using Smarty Templates. For information about the many uses of Smarty, please visit their website.
<http://www.smarty.net/manual/en/>
- ✔ Add a new page to your affiliate control panel.
[Admin Center: Templates > Custom Control Panel Pages](#)
- ✔ Edit the required information on the affiliate signup form.

- ✔ **Tip!**
When adding pages or new textual content to your control panel, use the language tokens. This allows you to control the language content from your admin center and prevents you from having to “hard code” the language into the templates thereby making the language packs useless.
