

## Flash Banners

Before uploading your flash banners, you need to make sure you have correctly published them (for iDevAffiliate) at the time of creation. If you don't follow this procedure, your flash banners will not be clickable links and your affiliates won't be able to send you customers. This tutorial assumes you have basic knowledge of Macromedia Flash.

A typical hyperlink in flash looks like this:

```
on (release)
{
getURL("http://www.easdesign.com");
}
```

The above code needs changed to look like this:

```
on (release)
{
activelink = actionURL;
getURL(activelink, "_blank");
}
```

You need to do this for all the flash banners you want to use in iDevAffiliate.
